<i>Project card</i>				
Subject:				
Analysis of stock market trends				
Main assumptions:				
<p>The program will analyze stock market data for the occurrence of different trends. Candlestick indicators of individual stocks and their volumes will be subjected to analysis in order to estimate the potential for profit when purchasing a particular stock at a given moment in time. Data for analysis will be read from sample data of companies from the kaggle.com or stooq.com websites.</p>
